# Model 28111 Series DECT 6.0 Cordless Handset Speakerphone System User's Guide

Your new GE telephone system is EXPANDABLE up to a total of 4 handsets (by purchase of optional Model 28110 handset with charge cradle)

### Equipment Approval Information

ed for connection to the Public Switched Telephone Network and is in ompliance with parts 15 and 68. FCC Rules and Regulations and the Technical Reguirements for Telephone Terminal Equipment published by ACTA

#### Notification to the Local Telephone Company

On the bottom of this equipment is a label indicating among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to vour telephone company.

The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) greas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details. Notes

This equipment may not be used on coin service provided by the telephone company

- Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
- Notice must be given to the telephone company upon permanent disconnection of your telephone from your line
- If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this product does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

#### US Number is located on the cabinet bottom. REN Number is located on the cabinet bottom.

#### 2 Rights of the Telephone Company

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action. the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must; (1) promptly notify you of such temporary discontinuance: (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and

Thomson Inc. 10330 North Meridian St Model 28111 Indianapolis IN 46290-1024 THOMSON 00015922 (Rev. 2 Dom E) © 2006 Thomson Inc rademark(s) ® Registered 06-46 THOMSON 🏠 Printed in China Marca(s) Reaistrada(s

The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service

## **Interference Information**

evice complies with Part 15 of the FCC Rules. Operation is subject to the following two condition This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the ECC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installat

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no augrantee that interference will not occur in a particular installation

Privacy of Communications may not be ensured when using this product.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna (that is, the antenna for radio or television that is "receiving" the interference
- Reorient or relocate and increase the separation between the telecommunications equipment and receivina antenna.
- Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected.

If these measures do not eliminate the interference please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal Communications Commission has prepared a helpful booklet. "How To Identify and Resolve Radio/TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402. Please specify stock number 004-000-00345-4 when ordering copies.

Notice: The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

# Hearing Aid Compatibility (HAC)

s telephone system meets FCC standards for Hearing Aid Compatibility.

### Licensing

# FCC RF Radiation Exposure Statement

his equipment complies with ECC RE radiation exposure limits set forth for an uncontrolled environmer This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines when used with the belt clip supplied with this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines

VARNING: TO PREVENT FIRE OR ELECTRICAL SHOCK HAZARD, DO NOT **EXPOSETHIS** RODUCT TO RAIN OR MOISTURE.

## Introduction

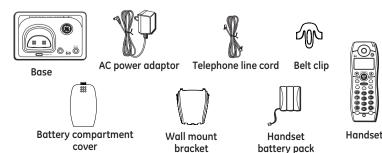

CAUTION: When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY INSTRUCTIONS provided with this product and save them for future reference

IMPORTANT: Because cordless phones operate on electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home goes out.

### Before You Begin

#### Parts Checklist (for 28111xx1 model)

Make sure your package includes the items shown here.

For Model 28111xx2 there will be ONE additional handset, charge cradle, belt clip, battery pack and cover than shown above

For Model 28111xx3 there will be TWO additional handsets, charge cradles, belt clips, battery packs and covers than shown above

For Model 28111xx4 there will be THREE additional handsets, charge cradles, belt clips, battery packs and covers than shown above

#### Telephone Jack Requirements

To use this phone you need an R J11C type modular telephone jack which might look like the one pictured here, installed in your home. **Modular** If you don't have a modular jack, call your local phone company to find out how to aet one installed.

### Installation

#### Digital Security System

Your cordless phone uses a digital security system to protect against false ringing, unauthorized access, and charges to your phone line.

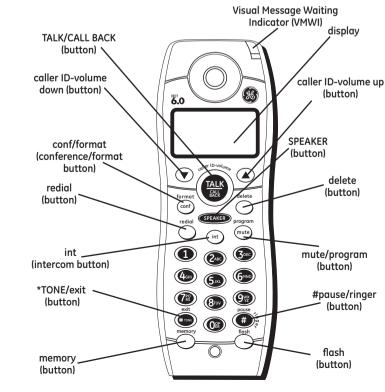

INSTALLATION NOTE: Some cordless telephones operate at frequencies that may cause or receive interference with nearby TVs, microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV. microwave ovens, or VCR. If such interference continues, move the cordless telephone farther away from these appliances

Certain other communications devices may also use the 1.9GHz DECT frequency for communication, and, if not properly set, these devices may interfere with each other and/or your new telephone. If you are concerned with interference, please refer to the owner's manual for thes devices on how to properly set channels to avoid interference. Typical devices that may use the 1.9GHz DECT frequency for communication include wireless audio/video senders, wireless computer networks, multihandset cordless telephone systems, and some long-range cordless telephone systems.

#### Important Installation Guidelines

- Avoid sources of noise and heat, such as motors, fluorescent lighting, microwave ovens, heating appliances and direct sunlight.
- Avoid areas of excessive dust, moisture and low temperature
- Avoid other cordless telephones or personal computers.
- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for
- Never touch non-insulated telephone wires or terminals, unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.

## Handset Layout

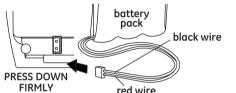

bracket

### Base Lavout

# (indicator) 6223 **Installing the Phone** Installing the Handset Battery NOTE: You must connect the handset battery before use. CAUTION: To reduce the risk of fire or personal injury, use only the Thomson Inc. approved Nickel-metal Hydride (Ni-MH) battery model 5-2721, that is compatible with this unit. 1. Locate battery and battery door which are packaged together inside a plastic bag and are separate from the handset 2. Locate the battery compartment on the back of the handset. 3. Plug the battery pack cord into the jack inside the compartment

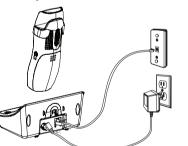

4. Insert the battery pack.

5. Close the battery compartment by pushing the door up until it snaps into place.

#### **Base Station**

- . Choose an area near an electrical outlet and a telephone wall lack (RJ11C), and place your cordless telephone on a level surface, such as a desktop or tabletop, or you may mount it on the wall
- Plug one end of the telephone line cord into the TEL LINE iack on the back of the base and the other end into a modular jack.

- 3. Plug the AC power adaptor into the electrical outlet and the DC connector into the jack on the back of the base
- 4. Place the handset in the base cradle. The charge/in use indicator turns on, verifying the battery is charging.
- 5. Allow the phone to charge for 16 hours prior to first use. If you don't properly charge the phone, battery performance is compromised

#### CAUTION: Use only the Thomson Inc. 5-2715 power adaptor that came with this unit. Using other power adaptors may damage the unit. This power adaptor is intended to be correctly orientated in a vertical or floor mount position.

#### Nall Mounting

- 1 Turn the base ove
- 2. Attach the wall mounting pedestal by first inserting the tabs on the open edge of the pedestal into the slots on the lower portion of the back of the base. Then push down and snap the pedestal into place.
- 3. Slip the mounting holes (on the back of the base) over the wall plate posts, and slide the unit down into place. (Wall plate not included.)

NOTE : If desired, gather the extra telephone line and power adaptor cord and store inside the wall mounting bracket.

# Proarammina the Telephone

#### Standby Screen

nage (button

The handset displays the handset number and user name.

USER NAME HANDSET X

NOTE: If the receiving handset does not answer within two minutes, the intercom call is automatically canceled. The originating handset displays NO ANSWER

. When finished, press the \*TONE/exit button or int button on either handset to deactivate the intercom.

NOTE: The system is expandable up to 4 handsets (by purchase of optional Model 28110 handset with recharge cradle) When 4 handsets are registered, the system can handle 2 separate intercom operations at once, for example, 1st handset intercoms with 2nd handset while 3rd handset intercoms with 4th handset

#### Receiving an Intercom Call

When you receive an intercom call, your handset beeps. To answer the call press the int button or TALK/CALL BACK button.

### **Advanced Intercom Features**

#### Receiving an Incoming Call During an Intercom Call

If you receive a telephone call during an intercom call, the intercom call is immediately terminated and both handsets ring. Either handset user may press the TALK/CALL BACK button to answer the call

#### Using Intercom with External Telephone Calls

During a telephone call, you may use the intercom/paging function to page another handset and have an off line, private (two-way) intercom conversation. You may also have a three-way conversation between the external caller and the handsets, or you may transfer the external telephone call to another handset

#### NOTE: Before you intercom/page another handset, you must decide whether you want to create a two-way or a three-way conversation.

#### Two-Way Calling

1. During an external call, press the int button, and use the touch-tone pad to enter the handset number you want to call.

NOTE: The receiving handset presses the int button to answer the intercom call. Both intercom users may speak privately. The external caller will not hear the intercom conversation.

When finished, press the \*TONE/exit button or **int** button to end the intercom call, return to the talk mode, and resume your original telephone conversation.

#### Three-Way Calling

- 1. During an external call, press the int button. *LINE ON HOLD EXTENSION?* shows in the display
- 2. Use the touch-tone pad to select Handset #. You will hear a paging tone and PAGING shows in the originating handset's display

#### NOTE: PAGING FROM ... shows in the display on the receiving handset, and the receiving handset presses the int or TALK/CALL BACK button to answer the intercom

. When the receiving handset connects, press the conf/format button on the originating handset to conference with the receiving handset and the external caller. **CONFERENCE** shows in the display on the originating and receiving handse

#### NOTE: A handset can enter conference mode directly by pressing TALK/ CALL BACK on the second handset during a call.

#### Transferring External Calls to Other Handsets

During an external call, you may transfer the external call to another handset.

- 1. Press the int button on the originating handset to put an external call on hold, and then page the receiving handset.
- . Use the touch-tone pad on the handset to select Handset #. You will hear a paging tone. PAGING shows on the originating handset's display, and PAGING FROM ... shows on the receiving handset's display.
- 3. When the receiving handset connects, press the TALK/CALL BACK button on the originating handset to transfer the call.

-0R-

4. Press the TALK/CALL BACK button on the originating handset to transfer the call. If the receiving handset does not answer within 30 seconds, the originating handset rings back and displays **CALLBACK**. If the originating handset does not answer within 20 seconds, the call is automatically dropped.

# Caller ID (CID)

IMPORTANT: In order to use this unit's Caller ID features, you must subscribe to either the standard Name/Number Caller ID Service or Call Waiting Caller ID Service. To know who is calling while you are on the phone, you must subscribe to Call Waiting Caller ID Service.

This unit receives and displays information transmitted by your local phone company. This information can include the phone number, date, and time; or the name, phone number, date, and time

### Call Waiting Caller ID

Provided you subscribe to Call Waiting Caller ID service from your phone company; if you receive an incoming call and you are using the GE multi handset system a been indicates the presence of a Call Waiting call on the line. The Call Waiting Caller ID information will be displayed and stored in the history of all handsets in the system.

• When you hear the call waiting beep in the handset receiver, press the flash button to put the current call on hold and answer the incoming call. Press flash again to return to the original call.

### Receiving CID Records

When you receive a call, the Caller ID information is transmitted between the first and second ring. The Caller ID information appears on the display while the phone rings, giving you a chance to monitor the information and decide whether or not to answer the call.

### Storing CID Records (In CID Memory)

If you are not at home or cannot answer, your telephone's Caller ID memory stores the data for the 40 most recent calls you received so you can see who called while you were unavailable. When the 41st call is received, the oldest Caller ID record (1st call) is automatically deleted.

You may review the stored information at any time. Calls received since your last review show as **NEW** in the display. Calls that have not been previously reviewed but were received from the same number more than once show as *REPT* in the display.

#### Reviewing CID Records

As calls are received and stored, the display is updated to let you know how many calls have been received. To scroll CID records:

- 1 Make sure the phone is **OFF** (not in talk mode)
- 2. Press the caller ID-volume ( ) button to review the newest CID record.
- 3. Press the caller ID-volume ( ) button to review the oldest CID record first.

#### Dialing a CID Number

- 1. Make sure the phone is OFF (not in TALK mode).
- 2. Use the caller ID-volume (  $\checkmark$  or  $\blacktriangle$ ) button to display the desired record.
- 3. Press the TALK/CALL BACK or SPEAKER button. The number dials automatically.
- NOTE: Depending on (a) how the incoming caller's phone number is formatted when it is received, and (b) whether or not you previously preprogrammed your local area code into the set up menu, you may need to adjust the format of the incoming caller's stored phone number before making the call, press the conf/format button to adjust the number, and

#### Available formats include

Number of digits	Explanation	Example		
Eleven digits	long distance code "1 " +3-digit area code +7-digit telephone number.	1-317-888-8888		
Ten digits	3-digit area code + 7-digit telephone number.	317-888-8888		
Seven digits	7-digit telephone number.	888-8888		

### Storing CID Records in Internal Memory

- You may also store CID information in the phone's internal memory
- NOTE: It is important that you format CID records correctly BEFORE storing in internal memory as you cannot reformat CID records stored in memory.
- 1. Make sure the phone is **OFF** (not in talk mode).

- 2. Use the caller ID-volume ( $\checkmark$  or  $\blacktriangle$ ) button to scroll to the desired CID record.
- 3. Press the Memory button to display **SELECT memory 01-50**.
- 4. Use the touch-tone pad to enter a memory location to store the number in that mem location You will hear a confirmation tone
- NOTE: If the memory location is occupied, REPLACE MEMO? is displayed, and you must confirm replacement by pressing the memory button

NOTE: Press the \*TONE/exit button once to keep the previous setting (making no changes) and return to the menu.

NOTE: If the selected CID record contains any information that is nonnumeric, the unit will not allow this record to transfer to the internal use memory. The handset will display UNABLE TO STORE.

### To Replace a Stored CID Record

- 1. Repeat steps 1 through 3 in Storing CID Records in Internal Memory. After you enter th memory location, **REPLACE MEMO?** shows in the display.
- 2. Press the Memory button again, and the new CID record replaces the old memory in location. You will hear a confirmation tone.

### Deleting a CID Record

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the caller ID-volume (  $\checkmark$  or  $\blacktriangle$ ) button to display the CID record you want to delet
- 3. Press the delete button. The display shows **DELETE CALL ID?**
- 4. Press the delete button to erase the record showing in the display. The display shows
- NOTE: Press the \*TONE/exit button to return to the standby mode without deleting any CID records.

### Deleting All CID Records

- 1. Make sure the phone is **OFF** (not in TALK mode).
- 2. Use the caller ID-volume ( $\checkmark$  or  $\blacktriangle$ ) button to display any Caller ID record.
- 3. Press and hold the delete button until **DELETE ALL?** shows in the display
- 4. Press delete button to erase all of the current CID records. The display shows **DELET** followed by NO CALLS.
- NOTE: Press the \*TONE/exit button to return to the standby mode without deleting any CID records.

### Memorv

Each handset can store up to fifty 20-digit numbers with up to 15-character names in n for quick dialing. This memory feature is in addition to the CID memory log, which stores 40 CID records in each handset.

#### Storing a Name and Number in Memory

- 1. Make sure the phone is **OFF** (not in talk mode).
- 2. Press the memory button to display SELECT MEMORY 01-50.
- 3. Press the desired memory location button (01 through 50) or use the caller ID-volume button to scroll to desired the memory location.

#### NOTE: If the memory location is occupied, the memory location number and stored name and telephone number shows in the display. If the memory location is empty, EMPTY shows in the display.

- 4. Press the memory button. The display shows ENTER NAME.
- 5. Use the touch-tone pad to enter a name (up to 15 characters). More than one letter is stored in each of the number keys. For example, to enter Bill Smith, press the 2 key tw for the letter B. Press the 4 key 3 times for the letter I. Press the 5 key 3 times for the Press the 5 key 3 times for the second letter L and press the 1 key to insert a space between the first and last name. Press the 7 key 4 times for the letter S: press the 6 ke once for the letter M; press the 4 key 3 times for the letter I; press the 8 key for the letter T; press the 4 key twice for the letter H

#### NOTE: If you make a mistake press the delete button to backspace and erase the wrong character(s) or number(s).

- 6. Press the memory button to confirm and save the record. The display shows **ENTER** TEL NUMBR.
- . Use the touch-tone pad to enter the telephone number (up to 20 digits, including pauses (press #PAUSE button), and press the memory button again to save the record. The unit beeps to confirm

#### NOTE: The system treats PAUSES as delays or spaces in the dialina seauence

3. Use the caller ID-volume ( or ) button to scroll to desired redial number.

You may transfer all three redial numbers into internal user memory.

2. Press redial button to display the most recent redial number.

4. Press memory button to display **SELECT MEMORY 01 - 50**.

Storing the Last Number Dialed

1. Make sure the phone in **OFF** (not in TALK mode).

8. To enter another name and number in a different memory location, return to step 2 and repeat the process

	<ol> <li>Use touch-tone pad to enter two digit desired memory location (01 through 50). Display will show ENTER NAME.</li> </ol>
mory	<ol> <li>Follow step 5 in the "Storing a Name and Number in Memory" section to enter name.</li> <li>NOTE: If the memory location is occupied, REPLACE MEMO? is displayed,</li> </ol>

# Belt Clip and Optional Headset

#### Connecting the Belt Clip

1. To attach the belt clip, insert the sides of the belt clip into the slots on each side of the handset

2. Snap the ends of the belt clip into place.

#### Connecting an Optional Headset to the Handset

Each handset can be used with an optional headset hands free operation.

- 1 Connect the headset to the headset jack on the side of the handset. The handset receiver and microphone are disabled when the headset is connected.
- 2. Adjust the headset to rest comfortably on top of your head and over your ear. Move the microphone to approximately two to three inches from your mouth.
- 3. Press the TALK/CALL BACK button to answer a call or make calls using the headset.
- 4. To return to normal operation, unplug the headset from the jack.

### Changing the Battery

CAUTION: To reduce the risk of fire or personal injury, use only the Thomson Inc. approved Nickel-metal Hydride (Ni-MH) battery model 5-2721, that is compatible with this unit.

- 1. Make sure the telephone is **OFF** (not in TALK mode) before you replace battery.
- 2. Remove the battery compartment door.
- 3. Disconnect the battery plug from the jack inside the battery compartment and remove the battery pack from the handset
- 4. Insert the new battery pack and connect the cord to the jack inside the battery compartment.
- 5. Put the battery compartment door back on.
- 6. Place handset in the base or handset charge cradle to charge. Allow the handset battery to properly charge (for 16 hours) prior to first use or when you install a new battery pack. If you do not properly charge the phone, battery performance will be compromised

### Battery Safety Precautions

- Do not burn, disassemble, mutilate, or puncture, Like other batteries of this type, toxic materials could be released which can cause injury.
- To reduce the risk of fire or personal injury, use only the **Nickel-metal Hydride** battery listed in the User's Guide.
- Keep batteries out of the reach of children.
- Remove batteries if storing over 30 days.

NOTE: The RBRC seal on the battery used in your Thomson Inc. product indicates that we are participating in a program to collect and recycle the rechargeable battery (or batteries). For more information go to the RBRC web site at www.rbrc.org

or call 1-800-8-BATTERY or contact a local recycling center.

#### Telephone Solutions

No dial tone

SEARCHING

UNKNOWN CALLER/

NAME/NUMBER

SPKR

- Check or repeat installation steps: Make sure the base power cord is connected to a working electrical outlet
- Make sure the telephone line cord is connected to the base and the wall jack.
- Connect another phone to the same jack. If it doesn't work, the problem might be your wiring or local service.
- The handset may be out of range of the base. Move closer to the base.
- Make sure the battery is properly charged (for 16 hours).
- Make sure the battery pack (in the handset) is properly installed.
- The handset should beep when you press the TALK/CALL BACK button, and the charge indicator on the base should be lit when the handset rests in the cradle. If not, the battery may need to be charged.

• Place handset in charge cradle for at least 20 seconds to reset the unit. landset does not rind

- Make sure the handset ringer software switch is set to on.
- The handset may be out of range of the base. Move closer to the base.
- You may have too many extension phones on your line. Try unplugging some extensions.

### Check for a dial tone

You experience static, noise, or fading in and out

- The handset may be out of range of the base. Move closer to base.
- Make sure base is not plugged into an electrical outlet with another household appliance. If necessary, relocate the base.

• Charge the battery (for 16 hours).

- Unit beeps Clean the charging contacts on the cordless handset and base charge cradle with a soft cloth or an eraser.
- See solutions for "No dial tone " on previous page.
- Replace the battery.

Memory dialing doesn't work

- Did you program the memory location keys correctly?
- Did you follow proper dialing sequence?
- Unit locks up and no communication between the base and cordless handset

 Unplug the power adaptor from the electrical outlet and the back of the base. Remove the handset battery. Wait for 30 seconds and plug the power adaptor back into the base and electrical outlet. Reconnect the battery and charge for 16 hours.

Use this feature to make calls from records stored in memory which reauire a seauence of numbers, such as a calling card number used for a frequently called long distance number.

The Number For	Memory Location
Long Distance Access Number	7
Authorization Code	8
Frequently called long distance number	9
<ol> <li>Make sure the phone is ON (in talk mode) by pressin button.</li> </ol>	g the TALK/CALL BACK or SPEAKER
2. Press the memory button, and then press 07.	
3. When you hear the access tone, press the memory bu	utton, and then press 08.

Caller information is interrupted during transmission or the phone line is excessively poisy. Indicates no CID information was received, you are not subscribed to CID service, or CID service is

Charge Indicator on the Base Flashes

• Provided your phone company offers voice messaging service and you subscribe to it, the charge indicator on the base flashes when the phone is not in use to indicate there is a message waiting. It's stops flashing after the message has been reviewed.

#### Caller ID Solutions No Display

- Charge the battery (for 16 hours). Or replace the battery
- Make sure the unit is connected to a non-switched electrical outlet. Disconnect the power adaptor from the base and reconnect it

#### aller ID Frror Message

• The unit displays this message if it detects anything other than valid Caller ID information during the silent period after the first ring. This message indicates the presence of noise on the line

No Caller ID

• You must be subscribed to the standard Name/Number Caller ID service from your local telephone company to receive CID information

### Batterv

If you experience any of the following problems, even after recharging the battery, you may need to replace the battery pack:

- Short talk time
- Poor sound quality
- Limited range
- Charge indicator fails to turn on

### General Product Care

o keep your unit working and looking good, follow these guidelines

- Avoid dropping the handset, as well as other rough treatment to the phone.
- Clean the phone with a soft cloth.
- Never use strong cleaning agents, paint thinner, abrasive powder, alcohol, or other chemical products to clean the unit. Doing so will damage the finish.
- Retain the original packaging in case you need to ship the phone at a later date. • Periodically clean the charge contacts on the handset and base with a clean pencil eraser

# Causes of Poor Reception

- Aluminum siding.
- Foil backing on insulation.
- Heating ducts and other metal construction that can shield radio signals.
- You're too close to appliances such as microwaves stoves computers etc.
- Atmospheric conditions, such as strong storms.
- Base is installed in the basement or lower floor of the house
- Base is plugged into AC outlet with other electronic devices Baby monitor is using the same frequency.
- Handset battery is low.
- You're out of range of the base.
